

QUICK GUIDE TO PLAY

Smart Pachinko in 60 seconds.

1

INSERT MONEY

Put ¥1,000 into the IC unit beside the pachinko machine, and press LEND (貸出 or 球貸) button. Your ball count appears on screen — you never touch a real ball.

2

ROTATE the launch dial (ハンドル) clockwise

Balls launch up the field. Start at about 50% power. After the ball is launched, it needs to pass through the left side of the screen in front of you.

3

FIND YOUR SWEET SPOT

The position that sends most balls toward the center START POCKET. Hold it completely still once found.

4

WHEN REELS SPIN — Watch for REACH (リーチ)

Two matching symbols, third reel slowing. Stay focused and get ready for an exciting animation sequence!

5

JACKPOT (大当たり)

Three matching symbols = the JACKPOT POCKET (アタッカー) flips open. It will display as “右打ちしてください”(Shoot to the right). Turn the dial to 100% and send the balls to the right.

6

CASH OUT

Press the COUNT button (計数). Your ball total transfers to the IC card. Press the Return button(返却) and take the card to the prize counter → Exchange for a special prize token, a gold token in most cases. → Walk to the nearby exchange shop → Receive cash.

*If money remains on your IC card, insert it into the settlement machine (精算機) inside the parlor to get it back as cash before you leave.
